Date : 23/05/2023

Location : Angarpur, Murshidabad.

Coordinate : N 23.900225, E 88.0799191

No. of students participated : 39

Teaching Staff participated: 2

Non-Teaching Staff participated : 0

Time Schedule : 07:00 am to 4:30 pm

Cause:

The main purpose of a survey is to get answers to important questions about the survey subject and to know the opinion of the common people of the survey area regarding the subject to know their problems about the livelihood, agriculture, educational status etc. and try to find solutions of those problems.

Objective:

The primary objective of the field study in Angarpur, Murshidabad, is to conduct comprehensive research and gather valuable data to achieve the following specific goals:

- i. To assess the socioeconomic conditions of the community in Angarpur, including income levels, education, healthcare access, and employment opportunities.
- ii. To examine the accessibility and quality of healthcare services available to the residents of Angarpur, including healthcare facilities and healthcare awareness.
- iii. To evaluate the state of education infrastructure and access to quality education for children and adults in Angarpur.

Supervised By: Mrs. Madhuparna Sarkar & Mrs. Saheli Banu

Report :

- i. One of the prominent findings from the field study in Angarpur is the existence of significant socioeconomic disparities within the community. There is a noticeable gap in income levels, with a portion of the population facing economic hardships and limited access to basic amenities.
- ii. The field study revealed that Angarpur faces significant challenges in terms of healthcare infrastructure.
- iii. The study found that the community's education system faces several challenges, including a shortage of schools, insufficient resources, and a lack of qualified teachers.
- iv. The field study identified a lack of industries and job opportunities within the community, leading to underemployment and unemployment issues.

Conclusion:

To solve problems effectively, start by defining the issue clearly, identifying its root causes, and setting specific goals for resolution. Then, gather relevant information and explore potential solutions, considering their feasibility and impact. Engage stakeholders and seek diverse perspectives to generate innovative ideas. Develop a well-thought-out action plan with timelines and responsibilities. Implement the chosen solution, adapting as needed along the way. Regularly evaluate progress and adjust strategies if necessary.
